

Time to Get Ready

Preparing for Philmont means developing...

Your Mind

- Grow your skills and knowledge
- Absorb the wisdom of Mr. LaRocca: Camping, Cooking, Hiking, Orienteering
- Expand your comfort zone (and your discomfort zone)

Your Body

- Exercise
- Participate in shakedown hikes / weekend treks

Your Gear

- "Less is more"
- Use stuff you already have, hand-me-downs, etc.
- Invest wisely
- Some items may make for great birthday or holiday gifts

Preparing for Philmont

| Date | Activity / Event |
|----------------|--|
| March 2023 | Day Hike #1 (5 miles with backpack): Camp Minsi, Pocono Mts., PA Crew training - hiking, navigation |
| September 2023 | Physical fitness - start slow, gradually increase duration / distance / difficulty Crew training - camping, cooking, hiking, backpacking MBs; discuss 50-miler award Crew organization |
| October 2023 | Payment #2 due Weekend Trek #1 (10 miles): French Creek State Park, PA Crew training - camping, cooking, bear bag |
| November 2023 | Gear clinic |
| December 2023 | Philmont trek and program selection discussion |
| January 2024 | Final Philmont trek and program selection Medical forms distributed Day Hike #2 (10 miles with backpack): Appalachian Trail, Pinnacle Peak, Hamburg, PA |
| February 2024 | Payment #3 due Travel plans - flights, ground transportation, hotels, Diversions? Pikes Peak, rafting, Air Force Academy??? |
| March 2024 | Adult wilderness first aid Crew supplies - first aid kit, tents, tarp, stoves |
| April 2024 | Payment #4 due Weekend Trek #2 (15 miles backpacking): Pine Grove Furnace State Park, PA Crew training - tarp, water treatment, sanitation |
| May 2024 | Weekend Trek #3 (15 miles backpacking): Appalachian Trail, Harpers Ferry, MD |
| June 2024 | Payment #5 dueMedical forms submitted |
| July 2024 | 7/19/24 travel to Philmont 7/21/24 Philmont trek begins 7/28/24 Philmont trek ends Travel home |

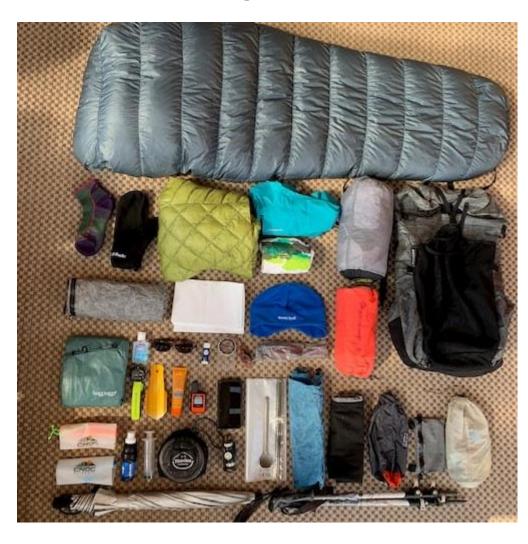

Trust the process... one step at a time

Packing Tips:

A Few Key Terms

- Base Weight: Weight of pack and all of its contents, minus consumables such as food, water, and fuel
- Trail Weight: Total weight of pack and all of its contents at time of trek start
- "Big Three": Three "systems" that tend to take up the largest share of base weight:
 - Shelter system (tent, ground cloth, poles, stakes, etc.)
 - Sleep system (sleeping bag, ground pad, etc.)
 - Pack system (pack, pack cover, pack liner, etc.)
- **Crew Gear**: Communal gear that is shared and is divided into approximately equal shares by weight. (Examples include water purification supplies, food, stoves, fuel, pots, cooking utensils, tents, bear bags, and group first aid and fix-it kits).
- **Personal Gear**: All gear selected and used primarily by each individual hiker.
- **Ultralight:** A popular movement in backpacking that strives for a base weight under 10 lbs. often at great cost and requiring shortcuts inconsistent with Scouting.

Packing Tips:

Ten Essentials

They're called "essentials" for a reason...

- **1. WATER.** Water bottles / containers; Water purification method(s).
- **2. FOOD.** Meals, snacks, drink mix. "Hiker hunger" is real.
- **3. FIRE.** Matches and/or a fire starter; Fire itself is a key tool for cooking, warmth, or signaling.
- **FIX-IT.** A pocketknife, multitool, cordage and duct tape can be handy in a wide variety of situations.
- **FIRST AID.** A first-aid kit can be a lifesaver literally. A few items will allow you to treat scratches, blisters and other minor injuries. They should also allow you to provide initial care while waiting for help for more serious injuries.
- **SUN PROTECTION.** Sun protection might include sunblock, sunglasses, lip balm, long sleeves, and/or a wide-brimmed hat.
- 7. **ILLUMINATION.** A flashlight or headlamp is important for finding your way in the dark. Bring extra batteries, too.
- **8. INSULATION.** Bring extra clothing to match the weather. Multiple layers are best as layered clothing is adaptable to a wide range of temperatures.
- **9. NAVIGATION.** A map and compass and the knowledge to use them are key for any backpacking journey.
- 10. Rain GEAR. Rain can come in a hurry, and getting your clothes drenched is more than just uncomfortable, it can lead to hypothermia, a potentially fatal condition.

198 MAR

Considerations: Packs

- Select a pack that is properly sized for the hiker's torso
- Philmont requires a lot of capacity:
 - Internal frame: 75L+ (approx. 4,600 cu inches)
 - External frame 65L+ (approx. 4,000 cu inches)
- If your pack is too small, you will end up with a lot of junk hanging off...
- Aim for pack weight < 5 lbs.
- Test in store; adjust properly a bad fit will be torture
- No need for lots of bells and whistles
 weight adds up quickly
- No "frameless" packs for Philmont

Internal Frame Pack

External Frame Pack

Considerations: Footwear

Sooooo many passionate opinions...

Ankle support... Sweaty feet... Puddles... Personal preference (and living with your decision) is key

- Philmont requires extremely sturdy soles for rough terrain
- Make sure you break in footwear **GRADUALLY**
- Socks probably matter just as much as boots / trail runners
- You will probably get blisters... learn how to take care of them
- Philmont recommends also bringing a pair of "camp shoes" that can be used for stream crossings
- TAKE GOOD CARE OF YOUR FEET! (Or else you will be miserable)

Low-Top / "Trail Runner"

High-Top / **Traditional Boot**

Quick-

Drying

Waterproof

Official Philmont Guidance:

Boots – Mid to high top boots are highly recommended for ankle support on rocky, uneven trails. Boots should be well broken in before a Philmont trek. Waterproof boots are recommended: keeping your feet dry is one of the biggest keys to a successful trek.

Considerations: Clothing

NO COTTON!

- Always consider weather and environment
- Socks:
 - Two pairs for hiking (minimum)
 - Optional:
 - Liner socks to prevent blisters
 - Heavier, cozier sleep socks
- Basics follow principles of layering use multi-purpose gear:
 - Pants / shorts
 - Underwear
 - T-shirts
 - Long underwear
 - Long-sleeve shirt (sun protection!)
 - Sleepwear
 - Fleece / Wool / Down insulation layer(s)
 - Long pants REQUIRED for service project
 OK if convertible or rain pants
 - Pack warm hat and gloves VERY WINDY and COLDER at 12,440 ft.!

Considerations: Personal Water Bottles / Bags

- Philmont is in the high-mountain desert spanning elevations from 6,500 to 12,500 ft.
- At times, hikers will need to carry
 up to 4 liters of water, but will normally carry
 at least 2 liters
- All water will need to be purified
- 1 liter of water weighs 2.2 lbs. /
 1 gallon weighs 8.34 lbs.
- Pros and Cons:
 - A reservoir is convenient, but can be difficult to monitor reserves/consumption and is difficult to clean
 - Nalgenes are tough but heavy and bulky
 - Disposable water bottles can be very light make sure durable enough for the trek
 - Collapsibles are especially good for 2L extra capacity for dry camps
 - Once you put flavor/mix in a bottle, it is forever after a "smellable"

Packing Your Pack

1. Bottom

- Mid-weight items
- Squishable / bulkier items
- Items you don't need while hiking
- Ideal: Sleeping bag/pad

2. Middle / Closest to Body

- Heaviest items
- Ideal: Tent, water, cookware, stoves, fuel, heavy food

3. Middle / Further from Body

- Lightest items
- Ideal: Light-weight clothes

4. Top

- Lighter items
- Items you need while hiking
- Ideal: Extra layers, rain gear, trail food
